Sprint Wholesale VPN^{SM}

➤ **Automatic On-Net Termination** – Enjoy the cost savings of on-net usage with 10-digit dialing.
➤ **Operator Services** – Receive information and assistance in dialing.
➤ **Comprehensive Service** – Your private network can include dedicated and switched sites.
➤ **Four call types:**
   On-Net to On-Net requires dedicated access at both the originating and terminating ends.
   On-Net to Off-Net supports dedicated origination to switched termination.
   Off-Net to On-Net supports switched origination to dedicated termination.
   Off-Net to Off-Net supports switched origination to switched termination.
➤ **VPN Switched Digital Services** – If supported by the LEC, on-net and off-net switched data calls can be made.

Routing:
➤ **Alternate Routing** – Allows completion of calls to alternate destination during outage or busy condition.
➤ **Hotline** – Connect without dialing a number
➤ **Survivability Routing** – Provides additional route choices in case of local loop failure.

➤ **Custom Network Address** – Customize your own intracompany dialing plan.
➤ **Variable Length Dialing** – Gives you the flexibility of 4 to 15 digits in your dialing plan.
➤ **700 + 7-Digit Calling** – Allows Custom Network Address option for switched access locations.
➤ **Virtual On-Net** – Allows Custom Network Access at locations without dedicated access.

➤ **Accounting Codes** – Up to 5 digits can be validated or unvalidated.
➤ **Call Control/Override** – Control or limit the types of calls permitted.

➤ **"Bill Ready" File** – Customer specific traffic detail provided each month.
➤ **Simplicity** – Easily create and analyze reports for all your Sprint services and locations with Sprint Wholesale Billing Solution,^{SM} Sprint's user-friendly invoicing and management reporting platform designed specifically for the wholesale industry

- ► Take advantage of this high-quality telecommunications solution from anywhere in the U. S. and to more than 220 direct-dial international locations.

Responsiveness
- ► Deliver advanced features, such as multiple call option.
- ► Reduce the risk of calling card abuse.
- ► Increase your company's brand name recognition.

Single Source
- ► Your customers can keep in touch with the main office, clients and staff with a single card.

Sprint's abuse prevention system

Operator services branding

Accounting codes

Sprint Wholesale Billing Solution℠

Reliability and responsiveness from a single source℠

Sprint Wholesale FŌNCARD℠

> **Protected** - Diminish the dangers of calling card theft. FŌNCARD numbers are easy to remember with BTN+4. This advanced feature allows end-users to use their office or home phone number, plus a four-digit personal identification number of their own choosing. That means users don't have to carry or display their card when dialing at pay phones or other busy locations.

> **Secure** - Avoid calling card misuse. Sprint's Abuse Prevention System tracks and monitors calls, minimizing fraudulent card use.

> **Safe** - Help your customers improve security and simplify cost management with one- to five-digit accounting codes. For a small set-up fee and monthly charge, your customers can assign codes by client, project, employee, department or other accounting group.

Enhance Brand Identity:

> **Enhance customer loyalty** - Increase your brand name recognition by having our operators give your company's name when they answer the phone.

More of Your Customers' Business:

> **Customer improvements** - Help your customers save money, make calling easier, boost productivity, build a global business and stay connected with their customers.

Productivity:

> **Simplicity** - Easily create and analyze reports for all your Sprint services and locations with Sprint Wholesale Billing Solution.℠ Sprint's user-friendly invoicing and management reporting platform designed specifically for the wholesale industry.

Sprint Wholesale

Reliability and responsiveness from a single source℠

≡ *Sprint*®

Sprint Wholesale Private Line℠

Digital, fiber-optic communication services at up to 45 Mbps.

Sprint Wholesale Private Line℠ is a group of private light and communication services ranging from a 4 KHz voice band to high-capacity private line for high-volume applications.

Reliability
- Route diversity and customer-specified routing provide full network backup and disaster avoidance.
- Sprint sets exceptional performance objectives for error-free seconds and network availability that are among the best in the industry.

Responsiveness
- Sprint manages the network 24 hours a day, seven days a week to readily identify and resolve network problems with minimal service disruptions.
- Sprint provides end-to-end service with worldwide technical support 24 hours a day.

Single Source
- Sprint provides focused, end-to-end private line services worldwide, through one-stop sales and service with many foreign carriers.
- Minimize the inconvenience and expense of working with multiple vendors. Let Sprint Wholesale provide your multinational digital service from end-to-end.

✦ Sprint®

Digital, fiber-optic quality for data and voice

Transmission bandwidth from 4 KHz to 45 Mbps

Constantly monitored for reliable service

Reliability and responsiveness from a single source℠

- ► A single, 4KHz voiceband circuit operating digitally through the Sprint fiber-optic network.
- ► A fully dedicated, cost-efficient alternative to Dial 1 or outbound service.

- ► Private Line DDS is a 100% digital, dedicated circuit that supports synchronous data communications.
- ► Choose transmission speeds from 2.4 kbps to 64 kbps in the U.S. and 56/64 kbps internationally.
- ► Use for bulk data transfer, LAN-to-LAN and LAN-to-Host connections, WANs, low speed video, and more.

- ► A dedicated, single-channel service, compatible with the international standard of 64 kbps.
- ► It features B8ZS line coding with a local access channel of the same speed or with a T1 access line with B8ZS line coding.
- ► Use for bulk data transfer, LAN-to-LAN and LAN-to-Host connections, WANs, low speed video, and more.

- ► An application-specific, banded-speed, dedicated digital service providing customizable bandwidth from 112 kbps to 1472 kbps.
- ► Use for LAN-to-LAN connections, low speed video, multimedia transport, PC-to-PC transfer or high-volume e-mail.

- ► A high-capacity, dedicated digital DS1 service transmitted at 1.544 Mbps (T1), the equivalent of 24 DS0 channels.
- ► The bandwidth is dedicated and not shared (as with packet services).
- ► Can be channelized in 24 circuits at 56 or 64 kbps speeds, or unchannelized for full 1.544 Mbps (1.536 Mbps internationally).
- ► Use for transaction processing, CAD/CAM, distance learning, high-speed imaging, multimedia, PBX tie lines, and more.

- ► A single, broadband circuit that transmits voice, data and video at 44.736 Mbps.
- ► Ideal for high-volume, high-speed transmissions - the equivalent of 28 DS1 or 672 DS0 channels.
- ► DS1 aggregation, corporate backbone networks, carrier route diversity, integrated voice, data and broadcast quality video.

Sprint Wholesale International

Help your customers reach global markets effectively.

Sprint Wholesale International℠ provides global toll-free, inbound services and high-speed international communications that keep your customers in touch with the world.

Reliability

➤ Count on Sprint's best-in-class network.

➤ Sprint's digital communication services are highly reliable and virtually error-free.

Responsiveness

➤ Sprint manages the network 24 hours a day, seven days a week to readily identify and resolve network problems with minimal service disruptions.

➤ Reduce the risk of CPE fraud with our advanced on-line surveillance system.

Single Source

➤ Fill all your international toll-free, dedicated outbound and high-speed digital transmission needs with Sprint.

≋◆ Sprint.

Digital, fiber-optic quality for data and voice

Your customers can expand globally with ease

International toll-free routing to domestic toll-free destinations

Reliability and responsiveness from a single source℠

Sprint Wholesale International

International Private Line:

- International Private Line 2.0 is a dedicated digital circuit that complies with International Telecommunications Union (ITU) standards and provides 2.048 Mbps transmission speeds, with 30 channels of bandwidth.
- International Private Line 2.0 is available between the U.S. and over 100 countries in Europe, Asia Pacific, Latin America, the Middle East and the Caribbean, including Russia and India.
- International Private Line Fractional 2.0 is available for those customers who need the uninterrupted, dedicated transmission quality of point-to-point international private lines, but not the full E1 bandwidth.
- International Private Line Fractional 2.0 is unchannelized at speeds from 128 kbps to 1.024 Mbps.
- Both services can be used to transmit integrated voice, data and video and bulk data transfers.

International Toll-Free:

- Provides automatic Sprint routing of an international toll-free number to a domestic toll-free number.
- Available as a stand-alone product or as part of your Sprint Wholesale Toll-Free Service.
- Eliminates the expense of international collect calls and provides flat, per-minute usage rates that vary by country and are billed in six-second increments (Mexico and Canada rates depend on distance and duration).
- International inbound calls can be routed to a location in the U. S., Puerto Rico, the U.S. Virgin Islands, Guam and CNMI
- Route Advance ensures that every call gets through during peak periods by routing overflow calls to a designated POTS number or alternate dedicated location.

International Dedicated Outbound:

- Deliver flexible, cost-effective solutions for all your outbound dedicated long-distance needs.
- Control costs, improve quality and add lines easily with T1 technology.
- Reduce the risk of CPE fraud with our advanced on-line surveillance system.
- Increase productivity with Sprint Wholesale Billing Solution,℠ Sprint's user-friendly invoicing and management reporting platform
- For a small set-up fee and monthly charge, your customers can improve security and simplify cost management by assigning accounting codes by client, project, employee, department or other accounting group.

Universal International Freephone Numbering (UIFN):

- Your customers can utilize a single toll-free number in different countries around the world.
- Inbound calls are routed to domestic toll-free numbers on switched or dedicated lines.
- UIFN is supported in the U.S., Canada and major European and Asian markets and growing daily.
- Numbers are registered and assigned by the ITU and are functional everywhere UIFN standards are supported.
- The same advanced routing options available with Sprint Wholesale International Toll-Free are available with UIFN service.
- Your customers can use a single global toll-free number for call centers, customer service, employee communications, reservations, sales and more.
